

PHY517 / AST443: Observational Techniques in Astronomy, Fall 2022

Instructor: Prof. Anja von der Linden, ESS 453, anja.vonderlinden@stonybrook.edu

Teaching Assistant: Aaron Mueninghoff, aaron.mueninghoff@stonybrook.edu

Teaching Assistant: Ben Levine, ben.c.levine@stonybrook.edu

Class Meeting Time/Place: Mondays. and Wednesdays., 2:40 pm to 5:30 pm, location: ESS 450

Data acquisition Lab 1: TBD with TAs, day-time

Data acquisition Lab 2: TBD with TAs and instructor, night-time

Data acquisition Lab 3: TBD with TAs and instructor, night-time

Data acquisition Lab 4: TBD with TAs and instructor, night-time

Class description

Astronomers explore the universe by detecting and analyzing light from all over the electromagnetic spectrum. We concentrate on a subset of techniques for detection of photons at visible wavelengths.

This is a lab course, focused on obtaining and analyzing astronomical data with optical telescopes. Students will work in groups of two or three to conduct observational experiments. In Lab 1, students measure properties of astronomical CCD cameras and develop a calibration scheme for optical imaging. In Lab 2, students will acquire and analyze time-series photometry of an exoplanet transit using the rooftop telescope. For Lab 3, students will use the roof-top telescope and a spectrograph to acquire and analyze spectra of a set of bright stars with a range of temperatures. For Lab 4, students will write a telescope proposal for a project of their own choosing with the rooftop telescope; each group will then conduct their highest-ranked project. The students will be responsible for setting up and calibrating the telescope equipment, obtaining their own data, analyzing the data, and reporting their work in lab reports written in the style of scientific papers.

The lecture component is intimately intertwined with the experimental aspects of the course. The students will learn the basics of practical observational astronomy, such as determining the observability of select targets, telescope and detector technology, the use of photometric and spectroscopic techniques, and methods of error, statistical, and time-series analysis. A limited number of homework sets will be assigned to facilitate comprehension of the lecture material.

Data analysis will be performed using standard astronomy software packages, as well as one general-purpose programming language such as python. In addition, students will need to familiarize themselves with standard Linux tools (such as bash scripting). Tutorials will be provided during class-time and/or as homework.

Towards the end of the course, the students will prepare a final oral or poster presentation on one of the projects.

Prerequisites (or equivalents for graduate students)

AST 203 (Astronomy): Students must be familiar with a broad range of astronomy topics.

PHY 277 (Computation for Physics and Astronomy): Students must be familiar with Linux and bash, and have basic programming experience in a language of their choice. Example code will be provided in python.

WRT 102 (Intermediate Writing Workshop): Students must be able to write scientific texts.

Course Website / Syllabus

All course materials will be available on the class webpage:

https://github.com/anjavidl/PHY517_AST443/wiki

Technical requirements

Students will be given a log-in for the SBU Astronomy Computing Cluster, on which all required software is installed. They can use these log-ins to work on one of the machines in the Astronomy Computing Center during normal business hours. Alternatively, they can access the Computing Cluster remotely through ssh with window forwarding. On Linux and Mac systems, the latter is straightforward. On Windows, ssh with window forwarding can in principle be done with the programs putty and Xming, but often fails. Students with Windows computers are encouraged to create a Linux partition on their system before the start of classes.

Communication tools

Lectures, tutorials, data help sessions, office hours, and observing sessions will take place in person. If a student is in Covid isolation or quarantine, they can join class through zoom. Asynchronous communication with the instructor, the TAs, and other students will be organized on slack.

Office Hours

von der Linden: TBD

Mueninghoff: TBD

Levine: TBD

Additional appointments may be arranged by e-mail or slack.

Textbook

There is no required textbook. Suggested texts are:

- Measuring the Universe, G. Rieke (Cambridge University Press, 2012)
- Data Reduction and Error Analysis for the Physical Sciences, P.R. Bevington & D. K. Robinson (McGraw-Hill Higher Education, 2003)
- Practical Statistics for Astronomers, J.V. Wall & C.R. Jenkins (Cambridge University Press, 2008)

Preliminary Course Schedule

#	Month	Day	Topic	Tutorial	HW assigned	HW due
1	Aug	22	Intro, Coordinate Systems	–	1	–
2	Aug	24	Time, Magnitudes, Atmosphere, Telescopes	bash, L ^A T _E X	2	1
3	Aug	29	CCDs, FITS files	python	–	–
4	Aug	31	Statistics 1	image processing	3	2
–	Sep	05	No class	–	–	–
5	Sep	07	Statistics 2	Source Extractor	–	–
6	Sep	12	Spectroscopy	–	–	3
7	Sep	14	<i>Data Analysis Help Session</i>	–	4	–
8	Sep	19	Instructions: Proposal Writing	–	–	–
9	Sep	21	<i>Data Analysis Help Session</i>	–	–	4
10	Sep	26	<i>Data Analysis Help Session</i>	–	–	–
11	Sep	28	<i>Data Analysis Help Session</i>	–	–	–
12	Oct	03	<i>Data Analysis Help Session</i>	–	–	–
13	Oct	05	<i>Data Analysis Help Session</i>	–	–	–
–	Oct	10	No class	–	–	–
14	Oct	12	<i>Data Analysis Help Session</i>	–	–	–
15	Oct	17	Time Allocation Committee	–	–	–
16	Oct	19	<i>Data Analysis Help Session</i>	–	–	–
17	Oct	24	<i>Data Analysis Help Session</i>	–	–	–
18	Oct	26	<i>Data Analysis Help Session</i>	–	–	–
19	Oct	31	<i>Data Analysis Help Session</i>	–	–	–
20	Nov	02	<i>Data Analysis Help Session</i>	–	–	–
21	Nov	07	Instructions: Final Presentations	–	–	–
22	Nov	09	<i>Data Analysis Help Session</i>	–	–	–
23	Nov	14	<i>Data Analysis Help Session</i>	–	–	–
24	Nov	16	<i>Data Analysis Help Session</i>	–	–	–
25	Nov	21	<i>Data Analysis Help Session</i>	–	–	–
–	Nov	23	No class	–	–	–
26	Nov	28	<i>Data Analysis Help Session</i>	–	–	–
27	Nov	30	Final Presentations	–	–	–
28	Dec	05	Final Presentations	–	–	–

Course Grade

The final grade will be based on the homeworks, midterms, and final exam using the following weighting:

- Lab 1 report: 15%
- Lab 2 report: 20%
- Lab 3 report: 15%
- Lab 4 report: 20%
- Project proposal and evaluation of peer proposals: 10%
- Homeworks: 10%
- Final Presentation: 10%

Computed this way, the overall course grade will range from 0–100. A curve will be applied to assign letter grades, based on student grades both this semester and past semesters. Historically, a combined score of 80 or above will earn a grade of A- or better.

Lab Report Grading

Lab reports are scored on a scale of 0 - 100. For Labs 2 and 4, the lab reports must be submitted in the style of a scientific paper, written in \LaTeX using the AASTeX package. Labs 1 and 3 are to be submitted as a jupyter notebook, including documentation (in \LaTeX), code, and plots. Each lab comes with weekly deadlines to complete parts of the analysis and the lab report. For every day that a data analysis check-in / the lab report is late, the final grade is multiplied by 0.95. Example: if the initial grade of a report was 80, but it was submitted 2 days late, the corrected grade will be 72 .

Attendance

Attendance is mandatory, unless a student is feeling sick or is in isolation / quarantine. In this case, the student MUST inform the instructor ahead of time, so that attendance / recording through zoom can be arranged. Students who are feeling sick are expected to take a Covid test. Unexcused absences result in 1 grade point penalty on the final grade. Up to 2 non-consecutive data analysis sessions can be missed without penalty, provided the instructor is informed ahead of time. Absence from the Time Allocation Committee or Final Presentation day results in forfeit of participation points of these components. Unexcused absences on scheduled observing nights results in a 50% penalty on the lab report grade.

Disability Support Services

If you have a physical, psychological, medical, or learning disability that may impact your course work, please contact the Student Accessibility Support Center, Stony Brook Union Suite 107, (631) 632-6748, or at sasc@stonybrook.edu. They will determine with you what accommodations are necessary and appropriate. All information and documentation is confidential.

Students who require assistance during emergency evacuation are encouraged to discuss their needs with their professors and the Student Accessibility Support Center. For procedures and information go to the following website: <https://ehs.stonybrook.edu//programs/fire-safety/emergency-evacuation/evacuation-guide-disabilities> and search Fire Safety and Evacuation and Disabilities.

Academic Integrity Statement

Each student must pursue his or her academic goals honestly and be personally accountable for all submitted work. Representing another person's work as your own is always wrong. Faculty is required to report any suspected instances of academic dishonesty to the Academic Judiciary. Faculty in the Health Sciences Center (School of Health Technology & Management, Nursing, Social Welfare, Dental Medicine) and School of Medicine are required to follow their school-specific procedures. For more comprehensive information on academic integrity, including categories of academic dishonesty please refer to the academic judiciary website at:

http://www.stonybrook.edu/commcms/academic_integrity/index.html

Critical Incident Management

Stony Brook University expects students to respect the rights, privileges, and property of other people. Faculty are required to report to the Office of Student Conduct and Community Standards any disruptive behavior that interrupts their ability to teach, compromises the safety of the learning environment, or inhibits students' ability to learn. Faculty in the HSC Schools and the School of Medicine are required to follow their school-specific procedures. Further information about most academic matters can be found in the Undergraduate Bulletin, the Undergraduate Class Schedule, and the Faculty-Employee Handbook.

Religious Observances

See the policy statement regarding religious holidays at

https://www.stonybrook.edu/commcms/provost/faculty/handbook/employment/religious_holidays_policy

Students are expected to notify the course professors by email of their intention to take time out for religious observance. This should be done as soon as possible but definitely before the end of the 'add/drop' period. At that time they can discuss with the instructor(s) how they will be able to make up the work covered.
